PAKURANGA  
AUCKLAND

Reference: 2285048

Date of Birth: [REDACTED]

NHI: [REDACTED]

Referred by : [REDACTED]  
Copies : NSU NUCHAL SCREENING PROGRAM

**OBSTETRIC ULTRASOUND** : 03 Mar 2010

**Indication:** Referred for evaluation of the nuchal translucency. Gestational age is 11 weeks 1 day (LMP 15/12/09, EDD 21/09/2010).

**Findings:** There is a single active fetus within the uterus. No early marker of fetal abnormality is detected.

Fetal measurements: CRL = 51mm, BPD = 18mm, nuchal translucency = 1.0mm.  
The placenta is posterior.

**Conclusion:** Gestational age based on ultrasound is 11 weeks 1 day ( $\pm$  5 days).

Films with patient.

In line with requirements of the Ministry of Health we no longer include risk assessment for Down syndrome. Single combined risk assessment for Down syndrome and other conditions will be provided by the National Screening Unit laboratory, following the completion of both the NT scan and the maternal blood test.
